

CREATION

Our children are studying creation in the month of September. Check out some of these resources which will give you information about creation, specifically Intelligent Design. Be equipped to counter the arguments for evolution that bombard our children. Be equipped to stand firm on the belief that creation is sensible, factual, and a valid worldview for our origins.

Please remember to test everything you read on the internet with the truth of God's Word. Some of these references may include ideas that aren't supported in Scripture. Take the good that is presented and challenge the bad.
